

ABSTRACT OF THE DISCLOSURE

5 A fishing bait apparatus for providing a hands-free method of
separating minnows according to size. The fishing bait apparatus
includes a container having side, upper and lower walls, and also
having an open top; and also includes a lid assembly including a lid
member being hingedly attached to the container and also including
lid support members for supporting the lid member in an open
10 position; and further includes a handle assembly including a handle
being pivotally attached to the container; and also includes bait
storage members being disposed in the container and upon the upper
wall.
